| <p>It was informed that Hindalco Industries Limited (HIL) has applied for GNA<sub>RE</sub> of 100 MW(50 MW within the region &amp; 50 MW outside the region) as a Bulk consumer seeking to connect to ISTS near Renukoot, Uttar Pradesh. As per the application, nearest ISTS sub-stations mentioned was 400 kV Vindhychal Pooling Station. Accordingly, the agenda for grant of GNA<sub>RE</sub> to M/s Hindalco Industries limited (HIL) was deliberated in 28<sup>th</sup> Consultation Meeting for Evolving Transmission Schemes in Western Region held on 30.04.2024. In the meeting it was informed that Hindalco vide e-mail dated 19.04.2024 has submitted the following:</p> <p>Quote</p> <p>Two 400KV D/c Power grid transmission lines are passing near to our plant:</p> <ol style="list-style-type: none"> <li>400 KV Rihand – Allahabad ckt 1 :<br/>400 KV Rihand – Allahabad ckt 2 :</li> </ol> <p>This line is within 10 KM distance from Renukoot plant (Load centre).</p> <ol style="list-style-type: none"> <li>400 KV Singrauli – Anpara<br/>400KV Singrauli - Allahabad ckt 1</li> </ol> <p>This line is within 10 KM distance from Renusagar Power plant (CPP).</p> <ol style="list-style-type: none"> <li>400 KV Vindhychal PS – Sasan<br/>This line is around 70km from Renukoot and we are already taking LILO tapping from the same line for Mahaan. So, we want to avoid the risk for 2 smelter plants in case of any disturbance in the same ckt.</li> </ol> <p>Unquote</p> <p>After deliberations in the 28<sup>th</sup> CMETS-WR meeting, it was decided that the first two options may be explored by M/s HIL in CMETS - Northern Region(NR) meeting. In the meantime, HIL may provide details of their captive power station so that preliminary analysis may be carried out for interconnection in Western Region either at HIL (Bargawan, MP) or Vindhychal PS.</p> |                |                             |                 |        |                                          |                                      |                                       |                                                  |                                 |                               |

| Sl No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Application ID | Name of the Applicant | Submission Date | Region | Nature of applicant | GNA <sub>RE</sub> within Region (MW) | GNA <sub>RE</sub> outside Region (MW) | Total Quantum of GNA <sub>RE</sub> Required (MW) | Start date of GNA <sub>RE</sub> | End date of GNA <sub>RE</sub> |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-----------------------|-----------------|--------|---------------------|--------------------------------------|---------------------------------------|--------------------------------------------------|---------------------------------|-------------------------------|
| <p>It may be noted that, currently Hindalco Plant at Renukoot is interconnected with STU network(UP) at 132 kV with Rihand Hydro project. Further, it is also connected to their Captive Power Plant(Renusagar-801.57 MW) &amp; Co-generation units (84 MW).</p> <p>Considering option 1 i.e. 400 kV Rihand-Allahabad and option-2 i.e. 400 kV Singrauli - Allahabad ckt 1 suggested by M/s Hindalco, studies were carried out. As per the studies, it was observed that short circuit level of Allahabad S/s is about 51kA (design level 40kA), Anpara S/s is about 52 kA (design level 40kA) and Singrauli S/s is 44kA (design level 40kA) . The short circuit levels at above stations have already exceeded the design limits. LILO of any of the above mentioned lines or direct interconnection of Hindalco Plant to any of the nearby generating stations will lead to further increase of the Short circuit current.</p> <p>As per the studies, even with interconnection of M/s HIL Renusagar captive power plant(801 MW) connected with same load, due to its short circuit contribution, the short circuit level will increase by about 1-2 kA each at Singrauli, Allahabad &amp; Anpara generation complex further aggravating the present critical situation. Further to limit the short circuit level in Anpara/Singrauli complex, opening of 400 kV Singrauli – Anpara line as an interim arrangement was discussed in various OCC meetings and recent NRPC meeting. The proposal is in the advance stage of finalization. In view of above constraints, it was opined that due to multiple technical issues in these complex, it is not feasible to grant GNA<sub>RE</sub> to M/s Hindalco in Northern region through discussed options.</p> <p>Grid India opined that Singrauli, Rihand &amp; Anpara generation complex is currently having very high short circuit as well as loading issues.. As the complex is already stressed, it is not prudent to grant GNA<sub>RE</sub> thorough interconnection in Singrauli, Anpara Rihand complex at this stage.</p> <p>Grid India also opined that the 400 kV lines from Singrauli, Rihand etc. are very old lines &amp; have already completed their useful life(&gt;35 years). Recently, POWERGRID has also brought up a proposal for replacement of towers in these lines. As these are very old lines, it cannot be guaranteed whether these lines will remain till 2061 (i.e. end date of GNA<sub>RE</sub>). CEA also endorsed that based on above issues , it is not prudent to grant GNA<sub>RE</sub> through interconnection in this NR complex.</p> <p>M/s Hindalco informed that they had earlier applied for 400 kV Connectivity at Anapara to UP STU but it was denied due to high short circuit level issues. Accordingly, it was also suggested that, as Hindalco is already an intra state connected entity, may explore the option of getting GNA<sub>RE</sub> as an intra state connected entity as per GNA regulation.</p> <p>Considering all the aspects discussed above, it was agreed that, presently, it is not feasible to grant GNA<sub>RE</sub> to M/s Hindalco in Northern region through discussed options. Accordingly, the 3<sup>rd</sup> option or any other option for getting interconnected with ISTS system of Western Region may be further explored in ensuing WR CMETS meeting.</p> |                |                       |                 |        |                     |                                      |                                       |                                                  |                                 |                               |

**A2. Application for Grant of GNA<sub>RE</sub> to entities other than STU under Regulation 20.1, 20.3 and 20.4 to entities under Regulation 17.1(ii), (iii), (v) and (vi): (Apr'24)**

| SI No. | Application ID | Name of the Applicant | Submission Date | Region | Nature of applicant                                        | GNA <sub>RE</sub> within Region (MW) | GNA <sub>RE</sub> outside Region (MW) | Total Quantum of GNA <sub>RE</sub> Required (MW) | Start date of GNA <sub>RE</sub>    | End date of GNA <sub>RE</sub> |

| 1      | 2200000691     | Linde India Limited   | 05.04.2024      | NR     | Drawee entity connected to Intra State Transmission System | 0                                    | 8                                     | 8                                                | 16.07.2024 (revised to 01.01.2025) | 30.06.2039                    |

It was informed that Linde India Limited has applied for GNA<sub>RE</sub> of 8 MW(Outside the region) as a drawee entity connected to Intra State Transmission System of PTCUL at 220 kV Jhajra S/s. In this regard, Linde India Limited has submitted NOC from PTCUL along with the application.

Uttarakhand has been granted GNA of 1402 MW as per 18.1 of GNA regulation. There is sufficient margin available in the existing ISTS system for drawl of additional 8 MW from ISTS periphery of Uttarakhand (PTCUL) network. In view of the above, it was proposed to grant 8 MW of GNA<sub>RE</sub> (outside the region) to Linde India Limited for drawl of power from ISTS network.

It was also informed that M/s Linde India has requested for Start Date of GNA<sub>RE</sub> from 16.07.2024. However, considering very short time available from the date of this meeting, M/s Linde India was asked to provide the revised start date of GNA. CTUIL informed that as in other cases, GNA<sub>RE</sub> may be granted from end of July'24. M/s Linde India in the meeting informed that they would like to revise their GNA<sub>RE</sub> start date from 01.01.2025. Accordingly, it was agreed to grant 8 MW GNA<sub>RE</sub> (outside the region) to M/s Linde India with start date of 01.01.2025. M/s Linde India was asked to confirm the revised date through mail/letter. Subsequently, M/s Linde India vide mail dated 11.07.2024 confirmed the revised start date of GNA<sub>RE</sub> as 01.01.2025.

### **A3. Application for Grant of GNA to entities other than STU under Regulation 20.1, 20.3 and 20.4 to entities under Regulation 17.1 (ii), (iii), (v) and (vi): (Apr'24)**

| SI No. | Application ID | Name of the Applicant              | Submission Date | Region | Nature of applicant                                           | GNA within Region (MW) | GNA outside Region (MW) | Total Quantum of GNA Required (MW) | Start date of GNA                  | End date of GNA |

| 1.     | 2200000721     | Cosmos Hydro Power Private Limited | 26-04-2024      | NR     | Injecting entity connected to intra-State transmission system | 19.53                  | 0                       | 19.53                              | 01.07.2024 (Revised to 01.09.2024) | 19.09.2033      |

It was informed that Cosmos Hydro Power Private Limited has applied for GNA of 19.53 MW (within the region) as a injecting entity connected to Intra State Transmission System of Himachal Pradesh through LILO of one circuit of 132 kV D/C Kurthla-Bathri line at Chanju-I HEP. In this regard, Cosmos Hydro Power Private Limited has submitted NOC from HPPTCL along with the application.

Himachal Pradesh has been granted GNA of 1130 MW as per 18.1 of GNA regulation. As the above application is for injection of Power into ISTS, this shall relieve the ISTS system for drawl of power by Himachal Pradesh. Therefore, there is a sufficient margin available in the existing ISTS system for injection of power into ISTS from intra state system of Himachal Pradesh.

| Sl No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Application ID | Name of the Applicant | Submission Date | Region | Nature of applicant | GNA within Region (MW) | GNA outside Region (MW) | Total Quantum of GNA Required (MW) | Start date of GNA | End date of GNA |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-----------------------|-----------------|--------|---------------------|------------------------|-------------------------|------------------------------------|-------------------|-----------------|
| <p>In view of the above, it was proposed to grant 19.53 MW of GNA (within the region) to Cosmos Hydro Power Private Limited for injection of power into ISTS network. Cosmos Hydro need to submit following Conn BGs within 30 days of issuance of intimation by CTUIL:</p> <ul style="list-style-type: none"> <li>• Conn BG1: Rs. 50 lakh</li> <li>• Conn BG3: Rs. 2 lakh/MW</li> </ul> <p>It was also informed that M/s Cosmos Hydro Power Private Limited in the application has requested for Start date of GNA from 01.07.2024. However, as the requested date has already elapsed, M/s Cosmos Hydro may confirm the new start date considering time required for regulatory compliances such as intimation issuance, BG submission etc.</p> <p>Regarding the Start date, M/s Cosmos requested for revised start date from 01.09.2024. The same was confirmed vide mail dated 10.07.2024. M/s Cosmos Hydro also requested CTUIL to waive off submission of Conn BG1 of Rs. 50 lakh as the entire project capacity of 19.80 MW has already achieved CoD on 14.09.2022 &amp; as per GNA Regulation, Conn BG1 shall need to be returned within 30 days of Commercial Operation. Therefore, it should not be applicable.</p> <p>Regarding requirement of Conn BG1, CTUIL in the meeting informed that they shall recheck the same and confirm. It is to confirm that, in the suo moto order on Petition No. 11/SM/2020 under Issue No.20 related to connectivity application of JITPL, CERC has already clarified that the contention of CTUIL for generation projects which have completed five years from commissioning, their respective Conn-BG requirements shall become NIL in accordance with the CERC Order dated 5.09.2023 in Petition No. 199/MP/2023, is incorrect. The entities are required to submit Conn-BGs as per applicable clauses of the GNA Regulations. An entity which had not obtained Connectivity or LTA under the 2009 Connectivity Regulations and has been COD for five years cannot be treated under Regulation 16 for return of Conn-BG or non-submission of Conn-BG. In view of the above, for the present application of GNA by Cosmos Hydro, Conn BG1 &amp; Conn BG3 shall be applicable.</p> <p>Accordingly, it was agreed to grant GNA of 19.53 MW (within the region) with Start Date from 01.09.2024.</p> |                |                       |                 |        |                     |                        |                         |                                    |                   |                 |

**A4. Application for Grant of GNA<sub>RE</sub> to entities other than STU under Regulation 20.1, 20.3 and 20.4 to entities under Regulation 17.1(ii), (iii), (v) and (vi): (May'24)**

It was informed that Ambuja Cements Limited has applied for GNA<sub>RE</sub> of 25 MW(Outside the region) as a drawee entity connected to Intra State Transmission System of RVPNL at 132kV GSS Mundawa. In this regard, Ambuja Cements Limited has submitted NOC from RVPNL along with the application.

Rajasthan has been granted GNA of 5755 MW as per 18.1 of GNA regulation. There is sufficient margin available in the existing ISTS system for drawl of additional 25 MW from ISTS periphery of Rajasthan (RVPN) network. In view of the above, it was proposed to grant 25 MW of GNA<sub>RE</sub>(outside the region) to Ambuja Cements.

It was also informed that M/s Ambuja Cement has requested Start date of GNA<sub>RE</sub> from 01.06.2024. However, as the above date has already elapsed, M/s Ambuja Cement may confirm the new start date. CTUIL informed that as in other cases, GNA may be granted from end of July'24. M/s Ambuja Cement informed that they have realigned their project for the GNA<sub>RE</sub> with revised start date from 01.09.2024 & end date to 31.03.2026.

CTUIL informed that the validity of RVPN NoC submitted by the applicant is only till 30.06.2025. Therefore, in case entity need to change their end date to 31.03.2026, the revised NoC upto 31.03.2026 from STU need to be submitted. M/s Ambuja Cement informed that they are in the process of obtaining revised NoC from RVPN. RVPN also confirmed that the revised NoC issuance to M/s Ambuja Cement is under process.

After deliberations, it was decided that the application shall be again taken up for discussion in the next CMETS NR meeting. M/s Ambuja Cement need to submit revised NoC before next CMETS NR meeting.

It was informed that Ambuja Cements Limited has applied for GNA<sub>RE</sub> of 15 MW(Outside the region) as a drawee entity connected to Intra State Transmission System of Himachal Pradesh(HPPTCL) at 132 kV Substation Chamakri (HPSEBL). In this regard, Ambuja Cements Limited has submitted NOC from HPPTCL along with the application.

Himachal Pradesh has been granted GNA of 1130 MW as per 18.1 of GNA regulation. There is sufficient margin available in the existing ISTS system for drawl of additional 15 MW from ISTS periphery of Himachal Pradesh (HPPTCL) network. In view of the above, it was proposed to grant 15 MW of GNA<sub>RE</sub> (outside the region) to Ambuja Cements Limited.

It was also informed that M/s Ambuja Cement has requested Start date of GNA<sub>RE</sub> from 01.06.2024. However, as the above date has already elapsed, M/s Ambuja Cement was asked to confirm the new start date. CTUIL informed that as in other cases, GNA may be granted from end of July'24. M/s Ambuja Cement informed

| SI No. | Application ID | Name of the Applicant | Submission Date | Region | Nature of applicant | GNA <sub>RE</sub> within Region (MW) | GNA <sub>RE</sub> outside Region (MW) | Total Quantum of GNA <sub>RE</sub> Required (MW) | Start date of GNA <sub>RE</sub> | End date of GNA <sub>RE</sub> |
|--------|----------------|-----------------------|-----------------|--------|---------------------|--------------------------------------|---------------------------------------|--------------------------------------------------|---------------------------------|-------------------------------|
|--------|----------------|-----------------------|-----------------|--------|---------------------|--------------------------------------|---------------------------------------|--------------------------------------------------|---------------------------------|-------------------------------|

that they have realigned their project for the GNA<sub>RE</sub> with revised start date from 01.09.2024 & end date to 31.03.2026.

CTUIL informed that the validity of HPPTCL NoC submitted by the applicant is only till 30.06.2025. Therefore, in case entity need to change their end date to 31.03.2026, the revised NoC upto 31.03.2026 from STU need to be submitted. M/s Ambuja Cement informed that they are in the process of obtaining revised NoC from HPPTCL.

HPPTCL informed that the signing of agreement for Medium Term Open Access is pending from HPSEBL. Therefore, the GNA<sub>RE</sub> may be granted after signing of agreement. CTUIL informed that once the NoC is issued by STU, there is no provision under GNA Regulations under which CTUIL can reject/hold the application due to non-signing of agreement with STU. If signing of agreement is a prerequisite, then HPPTCL should not have issued NoC before signing of agreement. M/s Ambuja cement clarified that with agreement signing, their STU commercial liability begins from given start date.

However, as the revised NoC is to be issued by HPPTCL, M/s Ambuja Cement, HPPTCL & HPSEPL may resolve their matter regarding signing of agreement and accordingly submit the revised NoC for grant of GNA<sub>RE</sub>.

After deliberations, it was decided that the application shall be again taken up for discussion in the next CMETS NR meeting. M/s Ambuja Cement need to submit revised NoC before next CMETS NR meeting.

| 4      | 2200000768     | Ambuja Cements Limited | 07.05.2024      | NR     | Drawee entity connected to Intra State Transmission System | 0                                    | 8.5                                   | 8.5                                              | 01.06.2024                      | 30.06.2025                    |

It was informed that Ambuja Cements Limited has applied for GNA<sub>RE</sub> of 8.5 MW (Outside the region) as a drawee entity connected to Intra State Transmission System of Himachal Pradesh(HPPTCL) at 220 kV Kangoo Substation (HPSEBL). In this regard, Ambuja Cements Limited has submitted NOC from HPPTCL along with the application.

Himachal Pradesh has been granted GNA of 1130 MW as per 18.1 of GNA regulation. There is sufficient margin available in the existing ISTS system for drawl of additional 8.5 MW from ISTS periphery of Himachal Pradesh (HPPTCL) network. In view of the above, it was proposed to grant 8.5 MW of GNA<sub>RE</sub> (outside the region) to Ambuja Cements Limited.

It was also informed that M/s Ambuja Cement has requested Start date of GNA<sub>RE</sub> from 01.06.2024. However, as the above date has already elapsed, M/s Ambuja Cement was asked to confirm the new start date. CTUIL informed that as in other cases, GNA may be granted from end of July'24. M/s Ambuja Cement informed that they have realigned their project for the GNA<sub>RE</sub> with revised start date from 01.09.2024 & end date to 31.03.2026.

CTUIL informed that the validity of HPPTCL NoC submitted by the applicant is only till 30.06.2025. Therefore, in case entity need to change their end date to

| 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 2200000769     | Ambuja Cements Limited | 07.05.2024      | NR     | Drawee entity connected to Intra State Transmission System | 0                                    | 7.5                                   | 7.5                                              | 01.06.2024                      | 30.06.2025                    |
| <p>It was informed that Ambuja Cements Limited has applied for GNA<sub>RE</sub> of 7.5 MW (Outside the region) as a drawee entity connected to Intra State Transmission System of Himachal Pradesh(HPPTCL) at 220/66 kV Upperla Nangal (HPSEBL). In this regard, Ambuja Cements Limited has submitted NOC from HPPTCL along with the application.</p> <p>Himachal Pradesh has been granted GNA of 1130 MW as per 18.1 of GNA regulation. The 220 kV Upperla Nangal S/s is directly connected with 400/220 kV Nalagarh(PG) S/s. From the studies it is observed that drawl of 7.5 MW from Upperla Nangal S/s increases the loading of ICTs (3x315 MVA) at Nalagarh(PG) S/s by about 2-4 MW under various scenarios. At present, the 400/220 kV ICTs at Nalagarh(PG) S/s are N-1 non-compliant which is also highlighted by Grid India in Operational feedback reports. To address the N-1 non-compliance of Nalagarh(PG) ICTs, the augmentation of 1x500 MVA(4<sup>th</sup>) ICT at Nalagarh (PG) S/s is already awarded by CTUIL vide OM dated 08.06.2023 with implementation timeframe of 24 months from the date of issuance of OM. In view of the above, 7.5 MW of GNA<sub>RE</sub> to Ambuja Cement for drawl of power from ISTS network can be granted with the above augmentation at Nalagarh(PG) S/s. Accordingly, it was proposed to grant GNA<sub>RE</sub> to M/s Ambuja Cement with start date from 08.06.2025.</p> <p>It was also informed that M/s Ambuja Cement has requested Start date of GNA<sub>RE</sub> from 01.06.2024. However, considering the SCOD of augmentation of ICT(4<sup>th</sup>) at Nalagarh(PG) S/s (i.e. 08.06.2025), it was proposed to grant GNA<sub>RE</sub> with Start date from 08.06.2025. Ambuja Cement may confirm the same. Further, M/s Ambuja Cement may also confirm their revised end date of GNA<sub>RE</sub> (more than 11 months beyond Start Date) &amp; M/s Ambuja Cement need to submit revised NoC from STU(HPPTCL) with validity period till revised end date of GNA<sub>RE</sub>.</p> |                |                        |                 |        |                                                            |                                      |                                       |                                                  |                                 |                               |

| SI No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Application ID | Name of the Applicant | Submission Date | Region | Nature of applicant | GNA <sub>RE</sub> within Region (MW) | GNA <sub>RE</sub> outside Region (MW) | Total Quantum of GNA <sub>RE</sub> Required (MW) | Start date of GNA <sub>RE</sub> | End date of GNA <sub>RE</sub> |

| <p>M/s Ambuja Cement in the meeting requested CTUIL whether they can be granted GNA<sub>RE</sub> with the existing system as the constraint is just 2-4 MW at Nalagarh(PG) ICT. Regarding this, CTUIL clarified that the ICT at Nalagarh(PG) is already having constraints and grant of GNA<sub>RE</sub> to M/s Ambuja Cement further increases loading by 2-4 MW. Therefore, GNA<sub>RE</sub> can be granted only with the augmentation of ICT at Nalagarh(PG). M/s Ambuja Cement informed that they would inform their decision regarding the present application in a week time.</p> <p>Subsequently, M/s Ambuja Cement vide mail dated 15.07.2024 informed their decision to withdraw the above application. In view of the above, it was decided to close the above application as per GNA Regulations.</p> |                |                       |                 |        |                     |                                      |                                       |                                                  |                                 |                               |

| SI No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Application ID | Name of the Applicant | Submission Date | Region | Nature of applicant                                        | GNA <sub>RE</sub> within Region (MW) | GNA <sub>RE</sub> outside Region (MW) | Total Quantum of GNA <sub>RE</sub> Required (MW) | Start date of GNA <sub>RE</sub> | End date of GNA <sub>RE</sub> |

| 6                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 2200000772     | ACC Limited           | 07.05.2024      | NR     | Drawee entity connected to Intra State Transmission System | 0                                    | 27                                    | 27                                               | 01.06.2024                      | 30.06.2025                    |
| <p>ACC Limited has applied for GNA<sub>RE</sub> of 27 MW (Outside the region) as a drawee entity connected to Intra State Transmission System of Himachal Pradesh (HPPTCL) at 220/132 kV Kangoo Substation (HPSEBL). In this regard, ACC Limited has submitted NOC from HPPTCL along with the application.</p> <p>Himachal Pradesh has been granted GNA of 1130 MW as per 18.1 of GNA regulations. There is sufficient margin available in the existing ISTS system for drawl of additional 27 MW from ISTS periphery of Himachal Pradesh (HPPTCL) network. In view of the above, it was proposed to grant 27 MW of GNA<sub>RE</sub> (outside the region) to ACC Limited.</p> <p>It was also informed that M/s ACC Limited has requested Start date of GNA<sub>RE</sub> from 01.06.2024. However, as the above date has already elapsed, M/s ACC Limited was asked to confirm the new start date. CTUIL informed that as in other cases, GNA<sub>RE</sub> may be granted from end of July'24. M/s ACC Limited informed that they have realigned their project for the GNA<sub>RE</sub> with revised start date from 01.09.2024 &amp; end date to 31.03.2026.</p> <p>CTUIL informed that the validity of HPPTCL NoC submitted by the applicant is only till 30.06.2025. Therefore, in case entity need to change their end date to 31.03.2026, the revised NoC upto 31.03.2026 from STU need to be submitted. M/s ACC limited informed that they are in the process of obtaining revised NoC from HPPTCL.</p> <p>HPPTCL informed that the signing of agreement for Medium Term Open Access is pending from HPSEBL. Therefore, the GNA<sub>RE</sub> may be granted after signing of agreement. CTUIL informed that once the NoC is issued by STU, there is no provision under GNA Regulations under which CTUIL can reject/hold the application due to non-signing of agreement with STU. If signing of agreement is a prerequisite, then HPPTCL should not have issued NoC before signing of agreement. M/s ACC Limited clarified that with agreement signing, their STU commercial liability begins from given start date.</p> <p>However, as the revised NoC is to be issued by HPPTCL, M/s ACC Limited, HPPTCL &amp; HPSEPL may resolve their matter regarding signing of agreement and accordingly submit the revised NoC for grant of GNA<sub>RE</sub>.</p> |                |                       |                 |        |                                                            |                                      |                                       |                                                  |                                 |                               |

| <p>It was informed that Indian Railways has applied for GNA of 50 MW (Outside the region) as a Bulk consumer seeking to connect to ISTS. As per 18.1 of GNA Regulations 2022, Indian Railways(Railways-NR-ISTS-UP) is granted GNA of 130 MW for ISTS drawl at ISTS interface at Auraiya and Dadri. Subsequently, CERC in its suo motto order dated 01.10.2023 on petition no. 15/SM/2023 has clarified that Railways shall be allowed to utilize its GNA quantum of 130 MW at Dadri, Auraiya, Naini or Abdullapur. Further, in case it needs additional GNA, it may apply for such quantum under the GNA Regulations.</p> <p>Now Indian railways had applied for additional GNA of 50 MW for drawl from Naini(Allahabad). However, there are constraints in 400/220 kV ICTs at Allahabad(PG) S/s for drawl of power. The ICTs at Allahabad (PG) are currently N-1 non-compliant which is also highlighted by Grid India in Operational feedback reports. To address the N-1 non-compliance of Allahabad (PG) ICTs, the augmentation of 1x500 MVA(4<sup>th</sup>) ICT at Allahabad (PG) S/s is already awarded to Powergrid by CTUIL vide OM dated 07.08.2023 with implementation timeframe of 18 months from the date of issuance of OM. Accordingly, 50 MW of GNA(outside the region) to Indian Railways for drawl of power from ISTS network can be granted with the above augmentation of ICT at Allahabad(PG) S/s.</p> <p>Indian Railways in the application has requested for Start date of GNA from 01.04.2024. However, considering the SCOD of augmentation of ICT(4<sup>th</sup>) at Allahabad (i.e. 07.02.2025), it was agreed to grant GNA to M/s Indian Railways with start date from 07.02.2025. M/s Indian Railways agreed for the same.</p> <p>It was also informed that, as per 22.2(b-i) of GNA Regulations, following Conn BGs are to be submitted by M/s Indian Railways within 30 days of issuance of intimation by CTUIL.</p> |                |                       |                 |                                          |                        |                         |                         |                   |                 |

| 1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 2200000829     | Noida Power Company Limited | 21.05.2024      | Drawee entity connected to Intra State Transmission System | 0                      | 100                     | 100                                | 01.06.2024(revised to 30.07.2024) | 31.03.2026      |
| <p>It was informed that Noida Power Company Limited has applied for GNA of 100 MW (Outside the region) as a Drawee entity connected to Intra State Transmission System of Uttar Pradesh(UPPTCL). In this regard, Noida Power Company Limited has submitted NOC from UPPTCL along with the application. Noida Power Company is mainly interconnected with UPPTCL network at 132/33 kV Surajpur, 220/132/33 kV RC Green, 400/132/33 kV Nodia Sector-123, 400/220/132/33 kV Nodia Sector-148, 220/132/33 kV Jalpura &amp; 220/132/33 kV KP-5 substations. These substations are further interconnected with 400 kV Greater Noida (UP) &amp; other substations of UPPTCL.</p> <p>In the Operational Feedback Report of Grid India, issue of critical loading of 400 kV Dadri-Gr Noida(UP) D/c line is reported. In the operational feedback, it is mentioned that though 400kV Dadri Th- Gr. Noida is a quad moose line and can carry power upto ~1750–1800 MW, it has been observed that after by-passing of 400kV Dadri-Maharanibagh-Ballabgarh at 400kV Maharanibagh, loading of 400 kV Dadri Th- Gr. Noida has further increased slightly &amp; loading of upto 1500 MW is observed in the above line.</p> <p>From the studies, it is observed that with additional drawl of 100 MW by Noida Power, the loading of 400 kV Dadri – Gr Noida(UP) line shall increase by about 10-15 MW under various scenarios. No other constraints at nearby ISTS points were observed. Grid India was asked to provide their observations in this regard.</p> <p>Grid India informed that the loading of 400 kV Dadri – Greater Noida line has touched 1500 MW this year also but has some margins. However, considering the loading of other interconnecting lines of Dadri, it is not likely to breach N-1 limit in near future. As the GNA requested by M/s Noida power is only till Mar'26, the chances of any constraints arising till that time is very less. Further, as Noida Power is already scheduling the power through T-GNA, the same power will get shifted to GNA. Therefore, there will not be much change in the loading due to above grant of GNA. Considering the above aspects, it was agreed to grant GNA of 100 MW(Outside the region) to M/s Noida Power.</p> <p>It was also informed that, M/s Noida Power has requested Start date of GNA from 01.06.2024. However, as the above date has already elapsed, M/s Noida Power was asked to confirm the new start date. M/s Noida Power informed that they would like to revise the start date from 30.07.2024. Accordingly, it was agreed to grant GNA of 100 MW(Outside the region) to M/s Noida Power with Start date from 30.07.2024. However, the applicant was asked to confirm the revised start date through formal mail/letter. Subsequently, M/s Noida power vide mail dated 10.07.2024 confirmed the revised start date.</p> |                |                             |                 |                                                            |                        |                         |                                    |                                   |                 |
